Test Result(s): Candle Fire Safety Labelling (EN 15494:2019)

Test standard: EN 15494:2019 Candles – Products Safety Labels

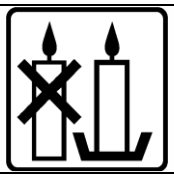

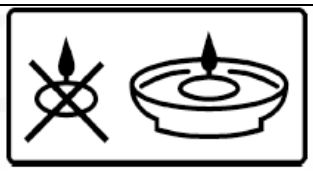

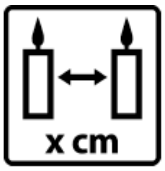

Clause	Requirement	Result	Rating Material No. 2
4.2	**Layout of the product safety label** The product safety label for candles consists of the following components: - general warning sign based upon ISO 7010 - W001 (see Figure 1). - mandatory supplementary safety information symbols or texts (see Tables 1 to 3). - optional supplementary safety information symbols or texts(See Annex A). The supplementary safety information symbols or texts shall be placed in close proximity to the general warning sign below and/or to the right beside the general warning sign(see Figure 2). Borders are optional. All components of the product safety label shall be in distinct contrast from its background. For candle labels made with one-colour printing, the background colour of the general warning sign does not need to be yellow.  **Figure 1 — General warning sign**  **Figure 2 — Examples of layouts of a product safety label for candles**	See Test Data Safety information beside the general warning sign	PASS
4.3	**Layout of supplementary safety information** - If safety information texts are chosen rather than safety information symbols then they or their practical equivalents shall be given in their own national language or languages of the country in which the candles are marketed.	The height of the safety symbols: 5.12mm	PASS

	- The supplementary safety symbols and text shall be reproduced as shown in Tables 1 to 3 and Tables A.1 to A.5. However, some degree of modification is permitted when cultural differences or special application formats (e.g. candle shape/type) need to be considered, provided the original meaning is retained and comprehension of the safety information is maintained. - The minimum height of the safety symbols is 5 mm provided that the content of the safety message is legible due to the quality of the print.		
4.4	Display of a product safety label - As a minimum the product safety label with the mandatory supplementary safety information (Tables 1 to 3) shall be visible and legible on the packaging or product. - If the space is limited, the optional supplementary safety information can be placed elsewhere, e.g. on the backside of a peel-off label or the inner sides of a fold-out label, together with the mandatory supplementary safety information repeated. There shall be clear indication where to find this additional safety information.	Safety labels on product	PASS

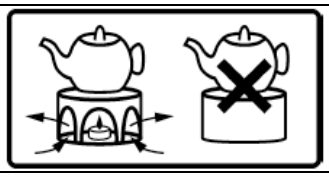

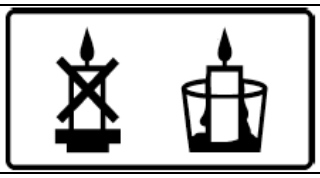

Remark:

1) The above only verified the integrity and standardization of the label, excluding the verification on the authenticity of the content.
